

Hydrassist Valve

Excellent for boosting pressure on long hose lays or for boosting low hydrant pressures. The light-weight hydrant valve enables the first-in pumper to lay LDH directly from the hydrant to the fire and when hose lay is completed, start flowing water from the hydrant. If additional pressure is required, another pumper can connect to the Hydrassist valve and start pumping to raise pressure and flow without interrupting the established water supply. The valve provides an emergency shut-down capability. Anodized internal ball. Choose from a variety of sizes of Storz or NST connections.

Technical data:

Length:	12.75"
Height:	13"
Width:	17"
Weight:	25 lbs
Friction loss @ 1,000 gpm:	3.3 psi
Rated pressure:	240 psi
